Formulating Hair Care, Styling & Temporary Colourants: An Advanced Guide Book

Contents

Chapter 1: Investigate and evaluate cosmetic ingredients	4
Chapter 2: Cosmetic ingredient and formula safety	65
Chapter 3: Compliance requirements of cosmetic ingredients	83
Chapter 4: Chemistry principles to select cosmetic ingredients	124
Chapter 5: Select preservatives for personal care formulas	192
Chapter 6: Select rheology modifiers for personal care formulas	244
Chapter 7: Select lipids for hair care formulas	324
Chapter 8: Fragrances and essential oil selection	354
Chapter 9: Emulsifiers for hair care formulas	375
Chapter 10: Surfactants for personal care formulas	402
Chapter 11: Develop aerosol formulas for hair styling	484
Chapter 12: Prepare hair care and styling formulas	515
Chapter 13: Prepare specialty hair formulas	595
Appendix A: Basic formulary	622
Appendix B: Formulation template	629
Glossary	630

Table of Contents

Chapter 1: Investigate and evaluate cosmetic ingredients

Item	Page
1. Ingredients in cosmetic products	6
1.1 Basic ingredient functions	6
1.2 Determining ingredient functions	12
1.3 INCI names and CAS numbers	16
1.4 Sourcing raw materials and information	18
2. Company philosophy	21
3. Natural vs. synthetic ingredients	28
3.1 Organic ingredients	28
3.2 Certified Organic ingredients	29
3.3 Natural ingredients	30
3.4 Derived from nature	31
3.5 Nature identical ingredients	33
3.6 Synthetic ingredients	33
3.7 Determining natural/synthetic status	34
3.8 Manufacturer's flowcharts	37
3. Ingredient composition	41
4.1 Certificates of Analysis (CofAs)	42
4.2 Calculation composition	43
Appendix A: Answers to Activities	48
Appendix B: Manufacturers flow chart for Lanette O	54
Appendix C: CofA for Myritol 318	55
Appendix D: Manufacturers flow chart for alkyl polyglycosides	59
Appendix E: Product information for Genapol LRO Paste	60
Appendix F: CofA for Hostapon SCI85	61
Appendix G: Data sheet for Genapol LRO Liquid	63
Appendix H: Flow chart for Genagen CAB 818	64

Table of Contents

Chapter 2: Cosmetic ingredient and formula safety

Item	Page
1. Safety evaluation and regulation	67
1.1 The safety of cosmetic and personal care products	67
1.2 The need for companies to evaluate	67
1.3 Safety considerations	68
2. Irritants and allergens in cosmetic products	72
2.1 Irritants and irritant reactions	72
2.2 Allergens and allergic reactions	77
2.3 Pregnancy and essential oils	81

Table of Contents

Chapter 3: Compliance requirements of cosmetic ingredients

Item	Page
1. Cosmetic products	85
2. Ingredient lists	87
3. Australian compliance overview	92
3.1 Cosmetic ingredient compliance	93
4. Overview of European, Japanese and US requirements	111
4.1 Overview of European Union regulations	114
4.2 Overview of Japanese regulations	121
4.3 Overview of US regulations	121

Table of Contents

Chapter 4: Chemistry principles to select cosmetic ingredients

Item	Page
1. Structures of chemicals in cosmetic science	126
1.1 Specific functional groups	126
1.2 Physical properties relative to functional groups	135
2. Surfactants	138
2.1 Surfactant charge	142
2.2 Different emulsifiers and emulsion types	146
3. Processing Methods	150
3.1 Physical processing methods	150
3.2 Minimal chemical processing methods	152
3.3 Synthetic chemical processing methods	155
3.4 Oxidation	156
4. Selection of ingredients	157
4.1 Selection based on structural suitability	157
4.2 Selection based on processing methods	158
4.3 Selection based on form of finished product	158
5. The role of pH in personal care science	182
6. Viscosity and specific gravity	186
6.1 Measuring viscosity	186
6.2 Specific gravity	187
Appendix A: Answers to activities	188

Table of Contents

Chapter 5: Select preservatives for personal care formulas

Item	Page
1. Preservative actions	194
1.1 Factors affecting preservative performance	194
1.2 Formulating to reduce microbial risk	198
1.3 Factors that increase microbial risk	201
1.4 Manufacturing considerations	202
2. Ancillary agents	203
2.1 Antioxidants	203
2.2 Chelating agents	207
3. Preservative efficacy (challenge) testing	212
4. Selecting the right preservative	218
4.1 Preservative considerations	218
4.2 Evaluating new preservatives	231
4.3 Worked examples: preservative selection	233
Appendix A: Answers to activities	239

Table of Contents

Chapter 6: Select rheology modifiers for personal care formulas

Item	Page
1. The properties of ‘flow’	246
1.1 Types of flow	246
1.2 Measuring viscosity	250
1.3 Shear in mixing	251
2. Purposes of flow in personal care	254
3. Gums and thickeners used in personal care	262
3.1 Water-based rheological agents	264
3.2 Oil based rheological agents	291
3.3 Gum/thickener selection checklist	298
4. Example formulas and formula builds	304
4.1 Example face/body gel formula build	305
4.2 Example serum build (emulsifier free)	307
4.3 Example o/w lotion/cream formula build	310
4.4 Example w/o lotion/cream formula build	312
Appendix A: Answers to activities	314
Appendix B: Selecting the right ‘carbomer’ for your formulation	318

Shaw, D. 1992. *Introduction to Colloid & Surface Chemistry 4th Ed.* Elsevier Science: Oxford.

Table of Contents

Chapter 7: Select lipids for hair care formulas

Item	Page
1. Lipids in personal care products	326
1.1 An overview of lipid types	327
2. Natural lipids	330
2.1 Natural oils and butters	330
2.2 Natural waxes	333
3. Natural derivatives of lipids	335
4. Synthetic lipids	337
5. Silicone	339
6. Selecting appropriate lipids for your formula	343
6.1 Lipid selection checklist	348
6.2 Worked example	349
Appendix A: Answers to activities	353

Table of Contents

Chapter 8: Fragrance or essential oil for personal care formulation

Item	Page
1. Essential oil blending	356
1.1 Blending top, middle and base notes	356
1.2 Blending by aroma type	357
2. Formulating with fragrances and essential oils	358
2.1 Legislation on essential oils and fragrances	359
2.2 Safety aspects of essential oils and fragrances	364
2.3 Usage rates	365
2.4 Incorporating fragrance and essential oils into products	366
2.5 Selecting fragrances and essential oils for personal care formulas	369
3. Fragrance and essential oils checklist	370
Appendix A: Answer to activities	372
Appendix B: Allergens according to EU cosmetics directive	374

Table of Contents

Chapter 9: Emulsifiers for hair care formulas

Item	Page
1. An overview of colloids	377
1.1 Colloidal mixtures	377
1.2 Improving stability	379
2. Forming stable emulsions	381
2.1 Agitation	382
2.2 Emulsifiers	384
2.3 HLB	389
2.4 Manufacturing conditioners	394
2.5 Stabilising emulsions	396
2.6 Selecting the appropriate emulsifier	397

Table of Contents

Chapter 10: Surfactants for personal care formulas

Item	Page
1. An overview of surfactants	404
2. Properties of surfactants	408
2.1 Surface tension	408
2.2 Foaming	420
2.3 Solubilisation	426
2.4 Detergency	429
3. Types of surfactants	433
3.1 Anionic surfactants	436
3.2 Cationic surfactants	443
3.3 Nonionic surfactants	443
3.4 Amphoteric surfactants	453
4. Reducing the irritancy of surfactants	457
5. Surfactant selection checklist	459
5.1 General method when manufacturing foaming surfactants	463
5.2 Selecting your surfactants	475
5.3 Making final adjustments	482

Table of Contents

Chapter 11: Develop aerosol formulas for hair styling

Item	Page
1. Components of aerosols	486
1.1 Propellants	487
1.2 Solvents	488
1.3 Active ingredients	489
1.4 Aerosol characteristics	496
2. Aerosol packaging	498
2.1 How aerosols work	498
2.2 Aerosol containers	499
2.3 Aerosol specialty packaging	500
2.4 Filling aerosol products into packaging	503
2.5 Developing aerosol formulas	504
2.6 Aerosol labelling	506
2.7 Volatile Organic Compounds (VOCs)	507
3. Personal care aerosol testing	509
Appendix A: Answers to activities	513

Table of Contents

Chapter 12: Prepare hair care and styling formulas

Item	Page
1. Physiology of the hair	517
1.1 Structure of the hair	517
1.2 Hair irregularities	538
2. Formulating basic hair care products	545
2.1 Shampoos	545
2.2 Conditioners	564
2.3 Styling products	576
Appendix A: Answers to activities	593

Table of Contents

Chapter 13: Prepare specialty hair formulas

Item	Page
1. Specialty hair products	597
1.1 Requirements of documentation for specialty ingredients	598
1.2 Selecting specialty ingredients	600
2. Hair colourants	610
2.1 Hair colour	612
2.2 Regulations related to colourants	613
2.3 Semi-permanent hair colourants	613
