

Formulating Colour Cosmetics

Belinda Carli
B Nat Ther., Dip Cos Sci

Contents

Chapter 1: Integrate colour principles into personal care development	4
Chapter 2: Select appropriate ingredients for colour cosmetic products	48
Chapter 3: Apply colour principles to formulate colour cosmetic products	102

Please note this book is used for training students, so refers to a 'Dropbox link' in several places. This Dropbox link contains a huge amount of additional information that is only suitable when also studying the lectures that accompany this training. If you would like access to the dropbox folders, please enrol in our study only or full certificate study.

Table of Contents

Integrate colour principles into personal care development

Item	Page

Table of Contents

Select appropriate ingredients for colour cosmetic products

Item	Page
1. Overview of ingredients	49
2. Powders	50
2.1 Calcium carbonate	51
2.2 Kaolin	51
2.3 Magnesium and zinc stearate	51
2.4 Magnesium carbonate	51
2.5 Mica	52
2.6 Polymers	52
2.7 Starch and modified starches	52
2.8 Talc	53
2.9 Zinc oxide	53
3. Lipids	54
3.1 An overview of lipid types	55
3.2 Oils and derivatives	57
3.3 Silicones	61
3.4 Waxes	61
4. Gums and thickeners	64
4.1 Water soluble thickeners	65
4.2 Oil soluble thickeners	70
5. Film formers	72
6. Ancillary agents	74
7. Manufacturing colour cosmetics	78
7.1 Mixing and grinding of pigments	78
7.2 Filling colour cosmetics	82
8. Quality control of colour cosmetics	86
8.1 Scale-up procedures	91
8.2 Stability testing of colour cosmetics	94
